

Candace Ellman, MA, Member Engagement Specialist

Candace has worked with Dr Benzi Kluger from the earliest days of the creation of the INPCS at the University of Colorado in 2017. She currently works as a Business Services Intermediate Professional for the Movement Disorders & Neuro-Palliative Care sections in the Department of Neurology at the University of Colorado Anschutz Medical Campus where she has been since April, 2016. Prior to joining the Neurology team, she worked at the Mother's Milk Bank as a production manager and at Children's Hospital Colorado as a Project Technician. Watching her mother and grandmother experience cognitive decline from dementia has inspired her to learn more about how we can prepare for the effects these illnesses have on individuals and families. Originally from Long Island, Candace has been a Denver resident since 1990. She received her BA from Oberlin College and her MA from the University of Denver. She plays the oboe in local community ensembles and enjoys spending time with her two children in the great outdoors.
