

Yaowaree “Noona” Leavell, M.D. is an assistant professor at the OHSU department of Neurology, where she works with patients and families with neuromuscular illnesses including ALS (Lou Gehrig's disease), myasthenia gravis, and hereditary and autoimmune peripheral neuropathy. She completed a Neurology Residency, Neuromuscular Fellowship, and a Hospice and Palliative Medicine Fellowship at the Icahn School of Medicine at Mount Sinai, Mount Sinai Hospital in New York City. She was drawn to INPCS because she believes that doctors and people living with neurologic illness can build a better system - one that honors the human side of medicine and allows for healing, mutual learning, and joy. Her favorite hobbies include hiking, painting with oils, Thai kickboxing, going to concerts and reading fun fantasy/sci-fi novels.
